

Fitting the Gliders

Figure 1

Figure 2

Figure 3

Figure 4

Figure 5

Instructions

Select which of the two brackets fits your size wheel best. At the end of each strap there is a hoop, which you attach to the bracket (Figure 1). Squeeze the bottom of the bracket and insert into the holes on the Glider (Figure 2).

Insert your front wheel and pull the bracket up against the wheel (Figure 3). Pass the long strap through the hole (Figure 4), then secure through the second strap (Figure 5).

Repeat for the other Glider. The Gliders are now set up for your wheels.

To take off simply loosen the straps and lift your wheel out. To put them back on put your wheel into the Glider and tighten the straps.

Do's & Don'ts

- Do make sure the straps are secure and tight
- Do use under adult supervision
- Do keep away from children when not in use - they are not a toy
- Do carry out regular checks of the straps to make sure they are secure
- Do stop using them at once if there are any faults with the Gliders or straps, and report to 2020 Mobility
- **DO NOT USE FOR SKIING**
